

Smart Energy Initiative
of Southeastern Pennsylvania™

The South Eastern Pennsylvania Smart Energy Initiative is pleased to present:

The Smart Energy Tour

The Smart Energy Initiative of Southeastern PA is excited to tell you about our premier event for high school students, grades 9 through 12. This year's Smart Energy Tour will inform and enlighten students about the technology behind alternative energy, as well as the associated career possibilities and requirements for these positions. Whether a student plans on high school diploma or a PhD., there are opportunities in this exciting field.

The Smart Energy Initiative will have its local, participating companies present on:

- What is Solar Energy, Geothermal, Efficiency, Wind and Bio Fuels?
- What are the current jobs in these fields?
- What does the future job market for these fields look like?
- What are the skills and educational prerequisites for entering these fields?
- Plenty of time for Q & A

Hands-on activities and live or virtual demonstrations will be presented for each field, and each participant will see all presentations. **Seating is limited to register today!**

Dates: Saturday April 21st, 2012

Location: Downingtown STEM Academy
335 Manor Ave
Downingtown, PA 19335

Time: 9:00am - 12:00pm
